

Core Skills: Robotic and Laparoscopic Colorectal Surgery

Saturday 30 November & Sunday 1 December 2024

CTEC's unique new Core Skills: Robotic and Laparoscopic Colorectal Surgery workshop is a highly practical one and a half day cadaveric workshop. It will provide WA based and Australian doctors with vital exposure to new robotic technology, together with the latest laparoscopic techniques. Participants will perform da Vinci robotic-assisted colorectal surgery and laparoscopic colorectal procedures.

It will also feature pre-reading, presentations and discussions, whilst allowing sufficient time for hands-on skills training on robotic and laparoscopic devices.

Device Technologies can provide registrants with the opportunity to familiarise themselves with the da Vinci system prior to the workshop via a hands-on test drive and simulation. Details will be provided upon registration.

In the workshop participants are paired on laparoscopic stations and

CTEC acknowledges the support of:

Convenor

Dr Abraham Jacob

Suitable for
