

# The Cutting Edge: Proceduralist Obstetrics & Gynaecological Skills

Friday 19 September 2025

The Cutting Edge: Proceduralist Obstetrics and Gynaecological Skills is a hands-on skills training workshop utilising simulation models. This workshop is designed to assist GP Proceduralists and GP Obstetricians in attaining an improved level of confidence in gynaecological and obstetric procedures. This workshop may be of particular interest to rural and remote medical practitioners holding a Diploma of the RANZCOG (DRANZCOG). Limited places are also available for KEMH Registrars in Gynaecological Surgery.

It will also feature debates, discussions and presentations on current gynaecological topics and devices. Workshop participants will return to their practice with newly acquired knowledge and the confidence to perform procedures practised under supervision in a realistic setting. It does not provide certification of competence in any of the procedures outlined and practised.

CTEC acknowledges the support of:

## Workshop Content

### Presentation and Animal Tissue

#### Practical Sessions:

- Electrodathermy, surgical safety
- Rectal repair
