The General Surgery Trainee Workshop provides General Surgical Trainees the opportunity to learn new skills, perform a range of general surgery procedures, and attain a greater understanding of anatomy through human tissue. Limited places are available for Service Registrars with strong surgical experience, for Observers, and for Theatre Nurses in the role of assistant.

This is the only General Surgery Trainee Workshop in Australia providing 100 per cent cadaveric dissection time on a range of open procedures, consolidating and enhancing anatomical knowledge and understanding.

This unique workshop will use a combination of pre-reading, discussion and dissection to further understanding of surgical techniques, and improve confidence in procedural skills and operative anatomy in a highly supportive and safe environment.
