The Core Skills: Level 2 Oncoplastic Surgery Workshop will provide participants with the opportunity to learn oncoplastic breast surgical procedures.

This hands-on cadaveric workshop focuses on a combination of surgical techniques which aim to provide best aesthetic outcomes with optimal surgical treatment and management of breast cancer.

It will use a combination of pre-reading, discussion and dissection to further trainees’ understanding of these historical and contemporary surgical techniques, the immediate anatomy of the structures operated on and adjacent structures which may be involved in the event of other co-morbidities or complications.

Limited Observer positions are available on this workshop.

CTEC acknowledges the support of the following:

**Workshop Content**
This workshop will focus on the following surgical procedures in dedicated cadaveric practical sessions:

- Mastectomy with subpectoral expander reconstruction.
- Serratus flap
