

CTEC Conference: Critical Care Medicine

Saturday 18 May 2019

Are you sometimes required to manage a critically ill patient?

This conference is designed to “fill the gaps” of subspecialist knowledge for those who treat critical care patients on an irregular basis.

Highly regarded specialists from **Emergency Medicine, Intensive Care and Anaesthesia** will present ways on how to manage and monitor critically ill patients relating to a particular subspecialty.

Presentation content will include case studies, tips and some of the latest techniques relating to the topic. Participants will be encouraged to engage in the interactive presentation format.

This conference will be of interest to doctors working in rural areas, hospital based doctors, Junior Doctors and GPs (Metro & Rural). Nurses and Medical Students are welcome (limited places).

This conference may also be beneficial to those who have attended the CTEC Emergency Surgery Conference and CTEC Critical Care Medicine Conference in the past.

CTEC acknowledges the support of the following:

Government of **Western Australia**
Department of **Health**

Conference Content

Specialists from a range of specialties will present on the following:

- SAFE Approach to the Critically Ill Patient
- Neurotrauma in WA: Current Management and Future Trends
- Toxicology of Snakebites in WA: Antivenin, Antidote Distribution and the Rural Challenge
- The role of FAST scans in the Emergency Department
- Fluid Management in Critical Illness
- Delirium in the Critically Ill: An Overview
- Advanced Airways: An Overview and **live presentation** of Awake Fibre-optic Intubation
- A Spectrum of Chest Pain Management: Prehospital and the Emergency Department
- Maxillofacial Surgery

Accreditation

This educational activity has been approved by RACGP - Total points 12 (Category 2). It is also approved for a 1 day Emergency Surgery grant.

This educational activity will be submitted to ACRRM and RACS
