

Core Skills: ENT Sinus Surgery

Friday 4 November 2022

Core Skills: ENT Sinus Surgery places a focus on increasing procedural knowledge and operative skills in established and emerging techniques in ENT sinus surgery. This hands-on cadaveric FESS workshop provides participants with exposure to some mandatory ENT Surgical Traineeship procedures using the latest highly specialised navigational imaging technologies. It will enhance participant knowledge of nasal sinus anatomy.

This workshop also features demonstrations by expert faculty utilising the latest 3D visualisation technology across a range of microsurgical procedures. It aims to improve surgical safety, operative confidence and procedural efficiency in a way that cannot be provided by routine surgical supervision or by other simulated environments.

The sessions are fully interactive with a high ratio of faculty to participants. Knowledgeable faculty will provide superior training and immediate feedback

CTEC acknowledges the support of:

Convenors
Mr Tim Cooney

Suitable for
RACS Surgical Trainees, Fellows and Junior Consultants in ENT. Limited Observer and assistant Theatre Nurse positions are available. This workshop is immediately followed by the Core Skills: Facial Plastic Surgery workshop the following day.
