

Team Care of the Bariatric Patient Workshop

Saturday 10 August 2019

Are you involved in the care of obese patients?

The number of Australians requiring bariatric care is increasing, and with this additional complications and risks may occur when a bariatric patient is involved.

This multidisciplinary approach to Bariatric patients workshop will be presented by a team of specialists in the fields of surgery, general practice, dietetics and psychology.

It will cover common comorbidities associated with obesity, recommendations for referral to specialists and allied health professionals, considerations relating to adolescent and elderly patients, and factors affecting fertility and pregnancy in the perioperative bariatric patient.

This workshop will include a balance of didactic sessions and workshops. Attendees will be encouraged to participate in the interactive sessions which will include a skills workshop, small group discussions and case studies.

CTEC acknowledges the support of the following:

Presentation content will include case studies, tips and some of the latest techniques relating to the topic.

Workshop Content

Highly regarded specialists from across a variety of medical specialities will present sessions on the following:
